

Alvoxcon USB Lapel Mic System

The Alvoxcon USB Lapel Mic System is under \$100 and is basically a plug and play wireless microphone system. It comes with two pieces: one-part plugs into a computer, iPhone or android, and the other part is a rechargeable microphone.

It could be used with a smart device with a text to speech app so that the person with a hearing loss can hand the microphone part to the person that is speaking and the person with hearing loss can read on their smart device what the person is saying up to 100 feet away.
